

# Right Party Contact Solutions

## OVERVIEW

TransUnion solutions filter billions of public and proprietary records in a matter of seconds to deliver actionable data with point-and-click ease.

## OUR THREE PRONGED APPROACH

Access powerful technology and data to contact the right person, right now.

Outdated data causes more than just frustration, it results in inefficient business operations, added expenses and eats away at your bottom line. Enhance your ability to reach the right party quickly with data-driven solutions powered by TransUnion.

Our database contains information on over 95% of the US population and over 350 million Social Security numbers, providing you with an optimal mix of coverage and accessibility to get the job done. With updates – as frequently as daily – to better support your demand for fresh information, you'll find comfort in knowing your organization is armed with actionable data that can be delivered at a moment's notice.

## TELEPHONE NUMBERS YOU CAN CALL AND COUNT ON

We understand you need accurate phone numbers to work efficiently. That's why we've amassed four billion telephone records, including landlines, mobile phones and VOIP's, with almost two billion proprietary numbers to boot. Our exclusive, linking algorithms — working at sub-second speeds — provide access to the single best phone number as determined by our unique models. With TransUnion, enhance your skip-tracing and recovery efforts with fresh, actionable data.

## ANALYTICS-BASED ADDRESS RANKINGS

Better addresses aid your ability to find and contact the right party with less stress. To support your business, our data scientists have developed an advanced, analytics-based model that provides exceptional rankings at no additional cost — helping you locate your subject quickly and affordably. Our rankings are derived from more than 11 billion unique name and address combinations and 60 variables built

around the person, address and person-address association. If your business relies heavily on recent addresses for locating subjects or chronologically accurate rankings for improved identity verification and due diligence, prepare to conduct business with more confidence than ever before.

## EMPLOYMENT SOLUTIONS THAT WORK

Whether you need employment data to locate consumers efficiently, help to facilitate the garnishing of wages or better investigate fraud more thoroughly to mitigate risk, TLOxp can help. With more than 225 million employment records; one of the largest sources of employment data in America. With three options including Standard, Premium and Verified delivered via web and batch processing services, we offer solutions for every budget. To learn more about each of these options and which is right for your budget and objectives, contact a TransUnion representative.

## DELIVERY HOW YOU WANT IT

TransUnion data is available when and how you need it. Whether it's through our intuitive, web-based application, TLOxp, or via our Batch Processing and API solutions, we've designed mechanisms that produce more economical and timely results.

### **TLOXP**

Comprised of public and proprietary records, this online interface is run by TLOxp®, part of TransUnion's TruLookup™ product line, and is used for locating and researching connections between individuals, businesses and assets.

### **TRULOOKUP BATCH PROCESSING**

This solution makes it fast and easy to handle high search volumes. Enter millions of subjects in a single search and we get to work filtering each one through our massive data repository.

- Receive multiple reports in one efficient file
- Receive completed files in unrivaled return time
- Encrypted data (SSL, PGP, IP restricted)
- Custom solutions available

### **TRULOOKUP BATCH MONITORING**

Continuous batch monitoring can instantly notify you of any changes or updates to your list the moment they happen.

### **TRULOOKUP API INTEGRATION**

Securely integrate with most of today's software systems using standard XML gateways and SOAP interfaces. This allows users to call up and view search results using their current and familiar applications.
