Data Solutions for Legal Professionals

How can you use TransUnion's data solutions?

- ✅ Bolster corporate and client due diligence

- ✅ Locate and qualify witnesses

- ✅ Vet expert witness credentials

- ✅ Visualize connections between people, places and businesses

- ✅ Uncover personal and business assets and debts

- ✅ Build audiences, analytics and notifications for class action/mass tort

- ✅ Due diligence searches for fraud and criminal investigations

Providing access to more than 1 billion data points, TransUnion's data solutions help law firms retrieve actionable information aggregated from public records, publicly available social media profiles and alternative data sources to enhance their practices and strengthen their cases.

MAKE BETTER-INFORMED DECISIONS, ACT WITH GREATER CERTAINTY AND INCREASE YOUR BOTTOM LINE

By tapping into TransUnion's vast data stores, attorneys can gain deep insights to help improve case outcomes, reduce investigative time and costs, and mitigate risk.

Criminal histories	Bankruptcies	Social media	Properties	Phone numbers
Motor vehicle records	Liens	License plate recognition	Vehicles	Addresses
Professional licenses	Utilities	Place of employment	Businesses	Relatives
Judgement data	Voter data	Driver's licenses	Email addresses	Known associates

TLOXP®: THE INTUITIVE ONLINE PORTAL

Our online portal provides database access to law firms via an intuitive interface. Generate 360-degree profiles of people, places and businesses in just a few clicks. Searches crawl our vast database in fractions of a second, drastically reducing research time and effort. You can also visualize connections among entities to quickly assess how they are related.

BATCH PROCESSING AND BATCH MONITORING

Ideal for matters involving high volumes of data, including class actions and mass torts, our Batch Processing service quickly retrieves data for large information requests. Use Batch Processing to identify contact information to distribute class notifications or other considerations in the early stages of litigation. To support data hygiene, our Batch Monitoring service continuously validates your data sets by monitoring for updates in our database.

API: INCORPORATE INTO YOUR WORKFLOW

Our API solution is ideal for firms that want to add powerful investigative and research capabilities to their existing legal technology. We seamlessly integrate the search capabilities of our database into your software's interface, which consolidates workflows and simplifies processes. Multiple users can conduct searches simultaneously, making it a scalable solution for firms of all sizes.

PICK THE SOLUTION THAT'S RIGHT FOR YOU

TransUnion's data solutions for legal professionals are designed to meet your unique needs. Contact us so that we can help identify which solution is right for you and your firm.

WHY TRANSUNION?

TransUnion helps you unlock the advantages of data.

Our solutions are:

→ **Comprehensive:** Our database contains more than 1 billion data points sourced from public and proprietary data sources.

→ **Current:** We update our data multiple times a day so that you're receiving actionable information.

→ **Intuitive:** Using our services requires no specialized training. If you can conduct an Internet search, you can use our products.

→ **Efficient:** Our solutions help reduce time and costs related to research and investigations.
